

In Memoriam

Boyan Lozanov - 1935-2020

It is with great sorrow that we learnt of the passing of Boyan Lozanov on 27 November, 2020. Professor Lozanov, was a leading figure in endocrinology in Bulgaria where he helped advance the field of thyroidology and inter alia, as National Consultant in Endocrinology at the University Hospital “Lozenets”. He was the inspirer of a whole generation of endocrinologists some of whom now continue his work. Boyan Lozanov was the founder and head of the Thyroid Section of the Bulgarian Society of Endocrinology, while his most important achievement was the development and implementation of a national strategy for prevention and elimination of iodine-deficient disorders in Bulgaria. He became an ordinary member of the ETA in 1994. He is survived by his son, Lachezar, who is also an endocrinologist, and his three granddaughters. The ETA expresses its profound condolences to his family and his colleagues.

Prof. Leonidas H. Duntas
Secretary of the ETA
